ANNOUNCEMENTS

SMLD announces cost reduction

The Sterling Municipal Light Department has announced that over the next few months its overall price per kilowatt hour will be reduced for all customers as power costs reduce along with the SMLD's cost to serve. Since last fall, the overall price has been reduced by one half cent per kilowatt hour, and, without any unforeseen emergencies, the SMLD is anticipating another half cent per kilowatt hour reduction by year's end. This would equate to an overall savings of \$5 for an average residential customer on a monthly basis.
