## SMLD educational seminars

The Sterling Municipal Light Department will host two customer educational seminars this fall. Both events will be held at the SMLD's main office at 50 Main St.

The first seminar will explore the benefits of the SMLD's upcoming meter technology known as the Advanced Meter Interface, or Smart Meters. The session will be held Thursday, Oct. 22, 4-5 p.m. Later this quarter, the SMLD will begin installing meters for all 3,700 of its customers.

The second seminar, on the subject of residential generator use, will be held Thursday, Nov. 19, 4-5 p.m. After the 2008 December ice storm, winter-preparedness is still atop everyone's mind. What residential generators are, where and how to buy them and directions of how to use them will be covered.

Call the SMLD Customer Service Department for more information, 978-422-8267, or visit [energysterling.com](http://energysterling.com).
